

Paris [s.] Rose Miles-Brenden

Developable Solutions

There have been two development(s) today.

a.) I established connection with others.... and verified they were real.

b.) I established a solution to measurement, in social and individual context.

Also, I found two-solutions to mental illness, for-me, in part of one, a global solution.

a.) A 'gap' in general between numerical identities, such that it is (1) and (4).

b.) Foresight as it relates to history of 'diagnostic' in-blind & fulcrative meaning, by which what was yet-arranged may lay a recollective pause, to exclusion of content and partial isolability, without categorical informed basis at prohibitive context in interpretation of trait, by which we potentiate through meaning what is included of a language, and it's abridgement without the erroneous inclusion of priority to the conceivable among a granted 'large' and 'minor' of a pattern of paraphrased.

Switch on Optical Cell

Program on Discernment of Equipment, and Exceptions and Test Call, and Deadman

Two Optical Cells and Compensator, MIDI, and Two Elliptic Gates and Driver(s)

Then:

Path[s] and Topological Dedkind Analytical Markov Pseudoprobabilistic Control (V/H)

Measurement* and Observation* at (@) Theory

The given guarantee, is a transistor-bias transistor-bias *model*, but *analogue*, and like three/two switches, but of intermediary flow and orientation at momentum, a neutrality and digital/analog model, on that of PQTF/PQTF.

What guarantee(s) this, is the apereceded prior conditional at channel-depth.

Adaptive Gate

Securable Safeties & Transparency

Consider Retiring

Penmanship/Note-taking & Language

Reduction of Power
